# Validation and Mapping

## Testing environment and equipment operating standards

Validation and Mapping is the process to confirm that a piece of equipment or area, such as refrigeration or a warehouse, has been tested and checked to an agreed set of protocols. ADM can provide an end to end process, from protocol creation, through testing, to the provision of reports. We have carried out Validation and Mapping services for both Public Sector such as the NHS and Private Sector such as pharmaceutical manufacturing and wholesale companies.

### GeneSysVM System Outline

Any piece of equipment or area that is temperature, humidity or CO2 sensitive can be mapped or validated. Validation and Mapping can be performed within a wide range of timescales and can also be repeated on a seasonal basis.

#### We provide

- a site visit to assess how many points in a specific area need to be mapped.
- a bespoke protocol which details how the exercise will be performed.
- assistance to clients to conform with MHRA, FDA, GMP and CFR 21 Part 11 guidelines, if required.

#### Testing and Mapping ranges

- CO2 range: 0.04% to 6%
- Temperature range: -196°C to +250°C
- Humidity range: 0 RH to 100 RH

### Testimonials

ADM have validated over 35 incubators, fridges and freezers since the facility opened in 2013. The MHRA and HTA regulators have been satisfied with the work carried out by ADM and the subsequent reports that have been provided. We continue to utilise the capable and friendly services of ADM and I can recommend them as a service provider to any business that requires similar regulatory compliance in the workplace.

#### Tamara Elston

Cellular Therapy Unit Quality Director,  
King's College Hospital

I have known the team at ADM for five years, and we have worked on a number of mapping and validation projects together. I have found ADM to be knowledgeable, reliable, efficient, cost effective and I have only ever received positive feedback from clients or colleagues I have introduced them to. I would not hesitate in recommending ADM.
